

Utilisation de l'utilitaire IDA.EXE pour modifier la base de données

- Objet** : IDA.EXE est un utilitaire qui permet d'ouvrir la base de données de DIALOGUE NT et de modifier les enregistrements, par exemple lors d'un passage de la version 6.4 à 6.7.
- Pré requis** : L'opérateur a une bonne base informatique, il est rigoureux et a conscience que toute modification de la DB influe directement sur la sécurité. Une sauvegarde préalable de la DB est obligatoire.

Changement de l'état d'une zone dans DIALOGUE NT dans le cas où il ne correspond pas à l'état dans la centrale.

Quittez
TERMINAL

1

Lancez les
services
Windows NT

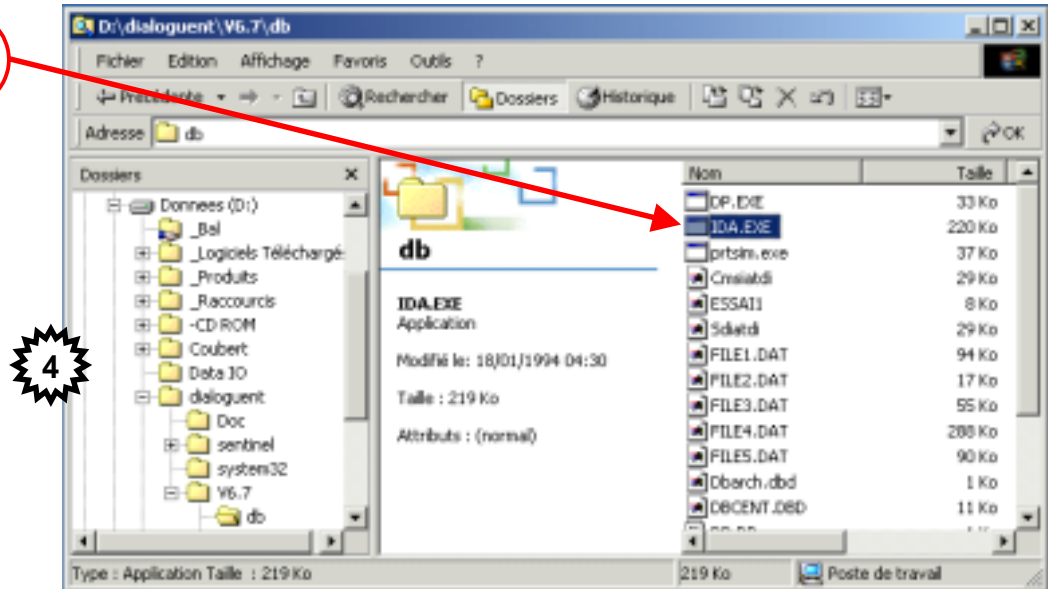

2

Arrêtez le service
DIALOGUE
SERVEUR

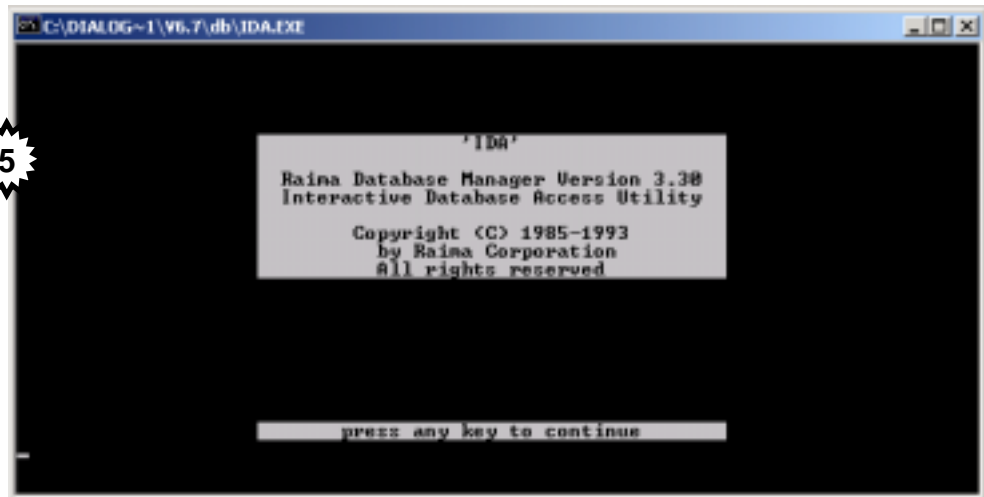

3

The first screenshot shows the TERMINAL application window with a red 'X' icon and a starburst '1' indicating it should be closed. The second screenshot shows the Windows NT 'Outils d'administration' (Administrative Tools) menu with 'Services' highlighted, accompanied by a starburst '2'. The third screenshot shows the 'Services' console window with 'Dialogue Serveur' selected and its status set to 'Arrêté' (Stopped), accompanied by a starburst '3'.

Lancez IDA.EXE

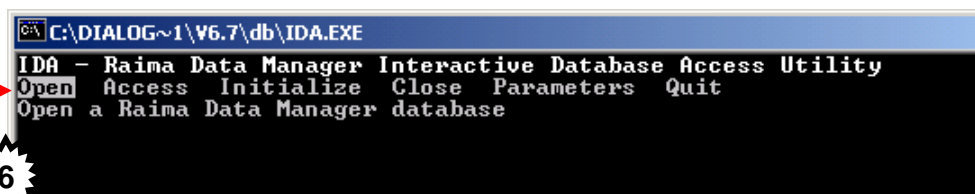

5

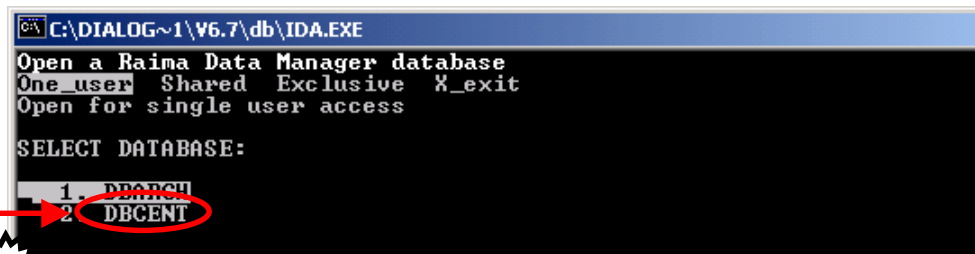

Validez Open puis
One_user

6

Sélectionnez
DBCENT

7

Validez Acces
puis Record,
puis Rescan,
puis Scan

8

```
C:\DIALOG~1\V6.7\db\IDA.EXE
IDA - Raima Data Manager Interactive Database Access Utility
Access Initialize Close Parameters Quit
Open a Raima Data Manager database_
```

- Sélectionnez 13. Zone puis Select.

Sélectionnez 13
puis select

9

```
D:\DIALOG~1\V6.7\db\IDA.EXE
Scan and view records based on database address
Scan First Last Next Previous X_exit
Scan and view records on database address

SELECT RECORD TYPE:
0. SYSTEME
